

DRYSEK

ALL-PURPOSE DRYING GRANULES

TECHNICAL SPECIFICATIONS

COLOR: Clear to white**TEXTURE:** Gelatinous mass**APPLICATION TEMPERATURE:** N/A**FLAMABILITY:** Non-flammable**COVERAGE:** Water surface around
10' x 10' x 1/2" = 600g of the product.

ADVANTAGES

- 🏠 Biodegradable and ecological
- 🏠 Holds up to 200 times its weight in water
- 🏠 Non-flammable
- 🏠 Gelatinous texture when retaining water : easily picked up with a shovel
- 🏠 Ultra-fast reaction time : ± 1 min
- 🏠 Odorless

COMPARATIVES

- 🏠 Much faster than sawdust
- 🏠 No need use to a pump
- 🏠 Great time saver

RESTRICTIONS: Reaction time slightly slower in colder water.

Make sure to free the application surface from any residu of Drysek after absorption process.

APPLICATIONS: DRYSEK can be used on all types of roofing membranes and will not damage their components. Moreover, it can be made into a water barrier in order to repair targeted areas of the roof. It will not clog up drains. Easily picked up with a shovel or a broom.
